DEALER CATALOGUE

CHAIN
CHOICE

For any system. For any bike. For any purpose.

COMPATIBLE

KMC chains are available for all common derailleur systems and they are compatible with the systems of all major manufacturers. The product names clarify this: the chains of the X11 series, for example, fit all 11-Speed systems and are suitable for all cycling disciplines.

STRAIGHTFORWARD

Almost all boxed KMC chains come with a MissingLink. The installation is very simple and a secure lock always guaranteed. With a standard chain de-riveter, each chain can be shortened to the correct length. For closing and opening the MissingLink we recommend our pliers.

DURABLE

The many field tests we have conducted, clearly show that KMC chains last much longer than comparable chains from other brands. We support this statement with our unique satisfaction guarantee Durability Warranty, proving the trust we put in our products.

KMC-Product features

UNIQUE GUARANTEE

The life of a KMC chain with this quality warranty is guaranteed to last longer than other brands. This durability treatment includes all DLC, e-Bike, XSL, XEL and X101 chains. If you are not satisfied with the durability of your chain, fill out the form on www.kmcchain.eu/warrantyclaim.

E-BIKE

Our e-Bike chains are specially designed for use in combination with strong mid motors. Optimized pin power and unsurpassed durability are the key features of our e-Bike chains.

10,000 KM+

For e-Bikes with internal gear hubs and strong mid motors we perfectly matched all drive train components. KMC's e101 EPT chain in combination with KMC's 3 mm wide chainring/sprockets ensure a lifespan of over 10,000 km – guaranteed!

3,500 KM+

KMC's e1 EPT chain in combination with KMC's narrow chainrings and sprockets for e-Bikes with internal gear hubs ensure a distance of over 3,500 km – guaranteed!

EPT

KMC's latest breakthrough in rust protection. EcoProTeQ treatment doubles the rust resistance compared to KMC's RB Anti-Rust treatment. Benefits of the smoother coating are less noise, optimum performance, maximum rust resistance and great look.

////// **DLC**

The main characteristic of the Diamond Like Coating is reduction of abrasive wear. Besides this, its surface hardness is higher than most coatings, this ensures a long-term function, optical stability and higher durability. Diamond durability guarantees unsurpassed durability for all DLC12, DLC11 and DLC10 chains.

////// **TI-N**

KMC's special Titanium Nitride coating not only looks fantastic, it has an ultra- smooth surface and is extremely durable.

////// **SUPER LIGHT**

Slotted inner- and outer plates and hollow pins are our way to reduce the weight of the chain to the maximum. KMC's X11SL weighs 225 grams per 110 Links only, being the very lightest of all 11-Speed chains.

////// **EXTRA LIGHT**

Slotted inner- and outer plates save weight without compromising the smoothness and durability of the XEL Series.

////// **DOUBLE X-BRIDGE**

Specially designed outer plate to enable fast, smooth and precise shifts.

////// **NON DIRECTIONAL**

Our chains are compatible with all major shifting systems, there is no given direction to mount the chain.

Derailleur systems

From trekking bike to road bike, derailleur shifting systems are the classic when it comes to sporty rides. As the developments in the market continue, we too keep developing. The innovative surface treatment of titanium nitride for example: this extremely smooth and hard surface reduces friction and ensures smooth shifting.

*KMC, official technical
partner of the Pro Tour
Team AG2R La Mondiale*

DLC-technology: extremely durable, extremely precise.

Our Titanium-Carbon-Nitride coated chains have an extremely hard surface, reducing friction and wear. As a result, they offer excellent shifting performance and a smooth transmission. Our high-end pin is another feature to reach the best possible durability.

Extremely light, extremely precise

2.05 grams per link (DLC11)

*It doesn't
just look great.
It is.*

X12 Thanks to the KMC titanium nitride coating, the X12 for 12-Speed systems looks great - and the special treatment of the pins ensure long life, while precisely chamfered inner and outer plates provide extremely accurate and fast shifts. You don't have 12-Speed yet? The X-Series is also available for 8 to 11-Speed systems.

X-Series

Regarding the specific characteristics of Shimano, SRAM and Campagnolo systems we developed a series meeting the highest demands. Precisely engineered, our dynamically chamfered plate angle provides a perfect shifting performance and a smooth transmission.

e-Bike Solutions

KMC is the first chain supplier offering specific chains for e-Bikes with mid motors.

Our analysis of power transmission on e-Bikes with mid-motors showed that conventional chains are not up to these extreme forces. The critical part is the pin which connects all the individual parts of the chain. It is exposed to the most extreme forces during shifting.

Our revolutionary riveting technology sets a new standard in e-Bike chains for derailleur systems. The e-Series KMC chains are extremely durable and offer unsurpassed durability for derailleur- and hub gear systems.

Lasts. And lasts. And lasts.

The 10,000 KM+ drive train is the solution for all e-Bike riders. The combination of our e101 EPT chain and our 3 mm wide sprockets and chainrings enable us to guarantee distances of at least 10,000 kilometres.

For narrow drive trains (1/2 x 3/32), we offer the e1 EPT and our narrow sprockets and chainrings guaranteeing distances of at least 3,500 kilometres.

Single Speed, Internal Gear Hub and Fixie.

We offer a wide range of Single Speed chains compatible with all Single Speed or hub gear systems. They are extremely robust and available with different product characteristics. Our golden K1SL has a Ti-N coating reducing friction while being a true eye catcher. The X-Series Models are based on bushed technology and provide a super-efficient transmission at a low weight.

Workshop Solutions

50 meter reels for the efficient workshop

For professional dealers with a busy workshop, we offer many chain models on workshop reels. Because of the increasing difference in chain lengths, especially for e-Bikes, a dealer has to hold more stock or order more regularly. The 50 meter reels offer the advantage of flexibility, you can shorten to the desired length with less waste and lower cost.

The key models are available packed on 50 meter reels, ranging from Single Speed up to 11-Speed chains. Obviously, KMC will include the right connecting links for proper and secure assembly.

Reel holder for wall or workbench mounting

Size: H 20 x W 15 x D 32 cm

- Cost-saving
- Space-saving
- Unroll, shorten and connect without waste
- Clear identification by barcode-enabled labels

RESPONSIBILITY: KMC is constantly striving to manufacture the best possible quality products with minimal environmental impact. On top of meeting European standards, KMC is the first and only chain manufacturer to measure their carbon footprint. In order to reduce emissions, energy intensive processes constantly undergo optimization. Also more obvious steps are taken like solar panels at our factories reduce, or even neutralize electricity consumption from our European operation.
